

# WE RESTARTED DAVID'S HEART.

When a rare cardiac condition stopped David's heart not once, but twice, he found himself in the one place that never stopped trying to bring him back. The cardiac team at Henry Ford Health performed a revolutionary procedure that restored his heart rhythms and his outlook on life. **WE ARE HENRY**

**WE  
BREATHED  
NEW LIFE INTO  
JEFF'S LUNGS.**

When Jeff started having breathing issues, he went to the one place he knew could help. The team of doctors at Henry Ford Health diagnosed him with lung cancer and performed a lobectomy using a minimally invasive robotic surgery that let Jeff breath a big sigh of relief.

**WE ARE HENRY**

**HENRY FORD HEALTH®**

A close-up, profile view of a man with short, graying hair, wearing black-rimmed glasses and large over-ear headphones. He is smiling broadly, showing his teeth, and appears to be singing or speaking into a professional studio microphone. The microphone is a silver and black condenser mic with a mesh grille, mounted on a black boom arm. The background is softly blurred, suggesting a recording studio or broadcast booth environment. The overall lighting is warm and focused on the man's face.

# WE HELPED AL FIND HIS VOICE AGAIN.

When a tumor on Al's vocal cords not only threatened the voice that had defined his career, but also his life, he turned to the team that he knew could help. The oncology team at Henry Ford Health came up with a nonsurgical treatment plan using radiation and chemotherapy that gave Al something to talk about. **WE ARE HENRY**
