

---

YOU JUST FOUND OUT YOU HAVE

*breast cancer.*

LET'S START BY REDUCING

*the lump*

I N Y O U R T H R O A T .

---

*We know you're going  
through a frightening time, and  
we're here to help.*

At the University Hospitals of Cleveland Ireland Cancer Center, easing your mind is just as important as easing your pain. So we'll do everything in our power to make you feel more comfortable. From in-depth discussions about treatment options, to the most advanced cancer care, making our patients feel better is what we do best.

Call 216-844-5432 or 1-800-642-2422 or visit [www.irelandcancercenter.org](http://www.irelandcancercenter.org).

# *Amazingly,*

JULIE'S DOCTORS FOUND THAT HER

# *back problems*

WERE ALL IN HER HEAD.

---

*At 5 years old, Julie was diagnosed  
with curvature of the spine.*

**T**HE doctors at Rainbow Babies and Children's Hospital helped straighten things out. They realized Julie's back problem was actually caused by a congenital herniation near the base of the brain. Her doctor performed a delicate surgery to correct the situation, and help reverse the curvature. It took a team of caring specialists to help make Julie better, and thanks to them Julie can now put her back problems behind her.

For a referral to a Rainbow Pediatrician or Specialist, call (216) 844-8447.

# *How far*

DID MICHAEL'S DOCTORS GO TO TREAT HIS

# *Cancer?*

T O T H E B O T T O M O F T H E

# *Pacific Ocean.*

---

*Given two weeks to live,  
Michael was willing to go anywhere  
for a second chance at life.*

So were his doctors at University Hospitals of Cleveland Ireland Cancer Center. We're the only hospital in Northern Ohio designated as a Comprehensive Cancer Center. And the only one testing a new drug called Bryostatins, which is made from a plantlike ocean animal. When it came to the best care, Michael's doctors went the distance. Michael on the other hand, only had to go a half a mile.

Call 216-844-5432 or 1-800-642-2422 or visit [www.irelandcancercenter.org](http://www.irelandcancercenter.org).

*At 56, he had already exhausted the standard treatments for a life-threatening form of thyroid cancer, and was dying.*

**T**HEN he came to University Hospitals of Cleveland Ireland Cancer Center. We're the only hospital in Northern Ohio designated a Comprehensive Cancer Center, and the only ones using combretastatin – a new therapy that saved Clayton's life. Clayton Twigg was willing to go anywhere for a second chance. Luckily, that chance was right around the corner.
